

EMILIO MAIDANA

Data Analyst | Python · SQL · Machine Learning

Paraná 473, CABA, Argentina | +54 11 3430-2227 | emiliomaidana12@gmail.com

LinkedIn: [emilio-maidana-a01781241](#) | GitHub: [EmilioMaidana](#)

PROFESSIONAL SUMMARY

Pursuing a Higher Technician degree in Data Science and Artificial Intelligence, combined with advanced studies in Information Systems Engineering (UTN). Specializing in Exploratory Data Analysis (EDA), data cleaning, and transformation using Python (Pandas, NumPy) and SQL, as well as supervised Machine Learning models with Scikit-learn. Currently coordinating the systems department at the Agency for Skills for the Future (Ministry of Education, GCBA). Proven experience in developing full-stack projects, including one deployed in production. Analytical, proactive professional dedicated to leveraging data for business decision-making.

TECHNICAL SKILLS

Languages & Queries: Python, SQL

Data Analysis & Manipulation: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning & Transformation (Data Wrangling)

Machine Learning: Supervised Learning, Linear Regression, Predictive Modeling, Scikit-learn

Statistics: Descriptive Statistics, Probability, Inference

Databases: PostgreSQL, SQL, Relational Database Design & Management

Visualization & Reporting: Microsoft Excel (Intermediate/Advanced), Matplotlib, Seaborn

Other Technologies: Java (Spring Boot), TypeScript (Angular, React Native), Docker, Git

Methodologies: Scrum, Kanban, ClickUp

Languages: Spanish (Native), English (B1 - Intermediate)

PROJECTS

MenteSalud — AI-Powered Health Marketplace In Development

Web and mobile platform connecting patients with healthcare professionals

- Developed an AI-powered conversational triage assistant to guide patients to the appropriate professionals.
- End-to-end data engineering: Data modeling (PostgreSQL, 37 entities), persistence, and outcome evaluation.
- Backend architecture using Java/Spring Boot with JWT security and AES encryption; web interface in Angular, mobile application in React Native.

Fletea — Freight & Moving Platform In Production

Online quoting and booking platform with integrated payment · www.fletea.com.ar

- Designed an algorithmic pricing engine (non-linear distance and cost calculation) using Google Maps Distance Matrix.
- Full-stack development and deployment: Java/Spring Boot, Angular, PostgreSQL, Docker, and Mercado Pago payment integration.

EXPERIENCE

Systems Area Coordinator 2025 – Present

Agency for Skills for the Future — Ministry of Education (GCBA)

- Lead the systems department and coordinate technology projects using Agile methodologies (Scrum, Kanban) managed in ClickUp.
- Organize, monitor, and analyze operational program data to generate reports supporting executive decision-making.

Receptionist 2023 – 2026

Regis Hotel S.A.

- Managed high-precision guest data registration and control using hotel management systems, ensuring data integrity.

Administrative Assistant 2015 – Present

Family Business (Vehicle Rental)

- Handled administrative management, operational control, and business data logging.

EDUCATION

Higher Technician in Data Science and Artificial Intelligence In Progress (Expected Nov 2026)

Higher Technical Training Institute No. 24 (IFTS 24) — CABA

- Key Coursework: Data Science, Data Exploration & Analysis, Data Mining Modeling, Machine Learning Processing, Statistics & Probability for Data Management, Database Administration, NLP.

Information Systems Engineering In Progress (3rd Year)

National Technological University (UTN) — Buenos Aires Regional Faculty

- Key Coursework: Algorithms & Data Structures, Programming Paradigms, Information Systems Analysis, Probability & Statistics, Computer Architecture, Algebra & Analytical Geometry, Logic & Discrete Structures.

High School Diploma (Natural Sciences)

Liceo Naval Militar Almirante Guillermo Brown

ADDITIONAL INFORMATION

- Midshipman, Naval Reserve (Argentine Navy): Training in leadership, teamwork, and discipline under pressure.
- Certified Skipper (Navigation License): Licensed for sailing and motor vessels up to 50 feet.
